**Date: Monday 27<sup>th</sup> July 2020**

**Issuance Time: 6:00 p.m.**

## OFFICIAL STATEMENT #3

### ATLANTIC LOW PRESSURE SYSTEM CONTINUES WESTWARD

The Trinidad and Tobago Meteorological Service (TTMS) has been closely monitoring a low-pressure system in the Atlantic which has an 70% (high) chance of development into a Tropical Depression over the next 48 hours.

The system is located approximately 1600 km east of the Lesser Antilles, centred near 12N 45W and is moving westward near 30 km/hr.

Current analyses suggest that on its projected track, the centre of the system is forecast to reach the Leeward Islands by the night of Wednesday 29<sup>th</sup> July, 2020. **At this time, the system poses no direct threat to Trinidad, Tobago, Grenada and its Dependencies.**

The TTMS will continue to closely monitor this system and will issue an update at 6:00 am tomorrow or earlier if the situation warrants. As always, pay close attention to information being issued by the TTMS by visiting [www.metoffice.gov.tt](http://www.metoffice.gov.tt), downloading our mobile app (search: TT Met Office) and following us on Twitter, Facebook and Instagram.

  
 Arnold Ramgoolam
