

PUBLIC WARNING MESSAGE

Date:	2022/06/28	Issuance Time:	11:09 PM
Event:	Tropical Storm	Message Type:	Update
Headline:	TROPICAL STORM WARNING #3 - ORANGE LEVEL		
Area Description:	Trinidad and Tobago		
Start Date/Time:	2022/06/28 08:00 PM	End Date/Time:	2022/06/29 05:00 PM
Urgency:	Expected	Response:	Prepare
Severity:	Severe	Certainty:	Likely
Description:	<p>At 11:00 pm tonight, the centre of Potential Cyclone Two was located near 8.7°N latitude 52.8°W longitude or about 950 km East of Trinidad. The system is moving toward the west near 17 mph (28 km/h), and this general motion is expected to continue for the next few days. On the forecast track, the system will pass near or over portions of the southern Windward Islands by late Tuesday or Tuesday night. As a result, Trinidad and Tobago remains under a Tropical Storm Warning. A Tropical Storm Warning means that storm conditions are likely over the warning area within 36 hours. Periods of heavy to intense showers and/or thunderstorms are likely, which can result in rainfall accumulations in excess of 3 inches. Gusty winds in excess of 70km/h can be expected. These wind gusts are capable of breaking tree branches, displacing unsecured roofs and loose outdoor objects, and can even topple over unhealthy trees. The risk of landslides/landslips is likely in areas so prone and sea conditions can become occasionally rough. The next update will be issued at 2am on Tuesday 28th June 2022.</p>		
Instructions:	<p>Prepare to protect lives, livelihood, and property. Plan your evacuation to a shelter if it becomes necessary. Always have emergency supplies of food and water on standby. Secure loose outdoor items and livestock. Do not wade or drive through flood waters. Pre-position sandbags if your area floods and monitor river levels. Follow the instructions of Government Officials. More information: www.metoffice.gov.tt/ ; www.odpm.gov.tt</p>
