**Date: Friday 28<sup>th</sup> August 2020**

**Issuance Time: 12:00 p.m.**

## **OFFICIAL STATEMENT #1**

### **ACTIVE ATLANTIC TROPICAL WAVE SHOWING SIGNS OF POSSIBLE DEVELOPMENT**

The Trinidad and Tobago Meteorological Service (TTMS) has been closely monitoring an active tropical wave in the Atlantic, with the leading edge now approximately 1100 km east of the Lesser Antilles. The wave has a low chance of development (20%) over the next 48 hours.

The system is moving towards the west near 25 km/hr. Latest analyses indicate that on the projected track, it should begin moving across the southern Eastern Caribbean islands on Sunday 30<sup>th</sup> August, 2020.

The TTMS will continue to closely monitor this system and will issue an update at 9:00 am tomorrow *or earlier if the situation warrants*. As always, pay close attention to information being issued by the TTMS by visiting [www.metoffice.gov.tt](http://www.metoffice.gov.tt), downloading our mobile app (search: TT Met Office) and following us on Twitter, Facebook and Instagram.
